XCI-SX100 / XCI-SX100C
XCI-V100 / XCI-V100C

SONY

Sony's Next-generation Smart Cameras for Machine Vision and Surveillance Applications – Now in Colour!

x86-Compatible 1 GHz CPU	Monitor Output Gigabit Ethernet USB 2.0	Customisable FPGA	Auto Iris	C/CS Mount

Sony is enhancing its intelligent camera line up with the introduction of four new cameras to its XCI Series – offering users a choice of VGA or SXGA resolution in either monochrome or colour.

The XCI-SX100/SX100C[1] is equipped with a 1/3-type progressive scan CCD that achieves outstanding picture quality and high-resolution SXGA images (1280 x 960) at 30 fps. The XCI-V100/V100C[2] employs a 1/3-type progressive scan CCD that captures clear images in VGA resolution (640 x 480) at a frame rate of up to 90 fps. Compared to previous models, these smart cameras are equipped with enhanced processing power (x86-compatible 1GHz, VIA Eden ULV), built-in Microsoft® Windows® XPe operating system, and a highly capable 512MB of SDRAM memory. They achieve high-speed processing with low power consumption, and also offer high-speed network operation up to 1000Base-T.

In addition, these unique cameras are equipped with various interfaces, including: two USB 2.0 ports, Gigabit Ethernet I/F to enable wideband transmission, monitor output, serial interface (RS-232C), trigger input, and exposure output. They also employ Field-Programmable Gate Array (FPGA) as an additional processing device, which enables easy customisation for system designers via programmable blocks. And when applications call for precise colour monitoring, the XCI-SX100C and XCI-V100C colour cameras are ideal. Combining high-quality image processing within the camera, direct data transfer via a network, and the ability to control peripheral devices, these intelligent cameras offer a perfect solution for machine vision applications. They are also an excellent choice for high-end security monitoring of parking lots, shopping centres, and train stations since they are equipped with several key surveillance features, including: support CS mount lenses, mounted Auto Iris interface, AWB, AGC, and Wide-D images. These next-generation smart cameras from Sony are ideal for traffic control, security, pharmaceutical, food and beverage inspection, as well as traditional machine vision applications.

[1] In the following text, `XCI-SX100' refers to both the XCI-SX100 and XCI-SX100C.
[2] In the following text, `XCI-V100' refers to both the XCI-V100 and XCI-V100C.

Features

High-performance Processor

x86-compatible CPU (1GHz, VIA Eden ULV) MMX, SSE, SSE2, and SSE3 compatibility. Low power consumption

512 MB main memory (DDR2 SDRAM)

Various Interfaces

Easy and direct monitor output (D-sub 15-pin)

High-speed network connectivity, up to 1000Base-T

USB 2.0 interface

Two USB ports allow users to control the camera via a mouse and/or keyboard

Auto Iris control, convenient for a wide range of security applications

Digital Input/Output and RS-232C allow cameras to connect with external equipment, such as sensors, strobe lights, and Programmable Logic Controllers (PLC)

USB Mouse   USB Keyboard   USB Memory
Monitor
Network   PC
PLC (Programmable Logic Controller)   PC   Auto Iris Lens
Rear Panel

Microsoft Windows XP Embedded Support

Enables the cameras to integrate with a wide range of machine vision systems and surveillance systems.

Excellent Picture Quality/ High Frame Rates

XCI-SX100/SX100C: SXGA (1280 x 960) at 30 fps, ideal for applications that require the capture of highly detailed images.

XCI-V100/V100C: VGA (640 x 480) at 90 fps, perfect for applications that require high-speed image capture.

SONY

vision   like.no.other™

C/CS mount lens

C/CS mount lens attachable to support both machine vision and high-end security applications, such as Intelligent Traffic System (ITS).

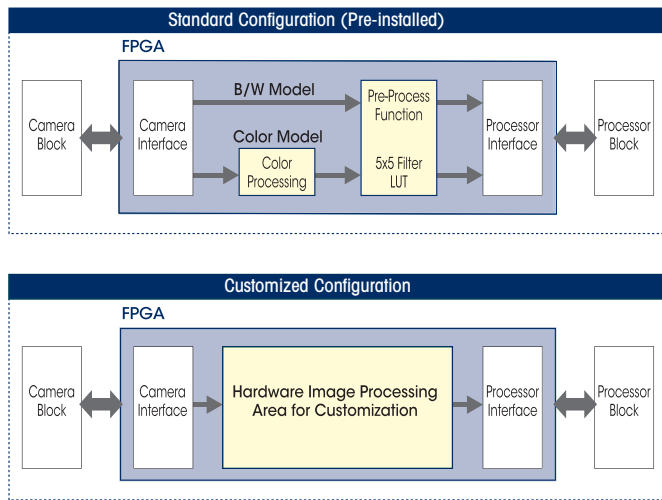

For Machine Vision
(C mount)

For High-end Security
(CS mount)

Full Range of Pre-processing Functions

- Colour-processing function enables the reproduction of extremely detailed images

- Built-in real-time 5 x 5 image pre-processing filter

- Hardware LUT (Look Up Table)

## Customisable FPGA
(Field Programmable Gate Array)

All four camera models contain customizable space in their FPGA block. This allows you to replace part of the pre-installed area with your own image-processing software, thereby increasing the camera's overall image-processing capability.

Customizable FPGA

Dual Readout by Wide-D Technology

This function allows you to capture two images at different shutter speeds. For machine vision applications, you can obtain two different images simultaneously and analyse them in separate ways without changing the lighting.
In addition, for security applications, a composite image with a wide dynamic range can be produced with software image processing.
Slow Shutter Speed   High Shutter Speed
Composite Image with Wide-D Technology

**Dual Readout by Wide-D Technology (simulated images)**

Watch Dog Timer (WDT)

This monitors software activity on the CPU and reboots the hardware if problems occur.
Other Features

- External trigger shutter

- Vertical and horizontal partial scanning function

- Vertical and horizontal binning function

- Selectable power supply between 12V and 24V

- High shock and vibration resistance

SPECIFICATIONS

	XCI-SX100	XCI-SX100C	XCI-V100	XCI-V100C
Sensor Block				
Image device	1/3-type IT progressive scan CCD			
Effective picture elements (H x V)	1,280 x 960 (SXGA)		640 x 480 (VGA)

Frame rate	30 fps (SXGA)		90 fps (VGA)	
Sensitivity	400 lx at F5.6 (0 dB)	2000 lx at F5.6 (0 dB)	400 lx at F5.6 (0 dB)	2000 lx at F5.6 (0 dB)
Gain control	Manual (0 to +18 dB, 0.1 dB steps)			
Readout modes	Normal, Binning (1 x 2, 2 x 2), Partial scanning (H/V 16 division), LUT, 5 x 5 filter	Normal, Partial scanning (H/V 16 division), LUT, 5 x 5 filter	Normal, Binning (1 x 2, 2 x 2), Partial scanning (H/V 16 division), LUT, 5 x 5 filter	Normal, Partial scanning (H/V 16 division), LUT, 5 x 5 filter
Normal shutter speed	2 to 1/100,000 s			
External trigger shutter	Trigger start (shutter speed: 2 to 1/50,000 s), Trigger start and exposure duration (4 s Max), Trigger inhibit function, Trigger delay function: 0 to 4 s, 1 ms step			
Strobe delay function	Delay function: 0 to 4 ms, 1 µs step			
Auto features	AGC, AWB, Auto Iris Control			
Processor				
CPU	x86 1GHz, VIA Eden ULV (L1 caches 64 KB x 2, L2 caches 128 KB)			
Memory	512 MB DDR2 SDRAM			
Interface				
Ethernet	1000 Base-T/100 Base-TX/10 Base-T			
Monitor output	D-sub 15 pin for multi scan monitor			
USB	Hi-Speed USB (USB 2.0) x 2			
Serial communication	RS-232C			
Iris control	DC			
Trigger input	Low: 0 to +0.5 V, High: +4.5 V to +24.0 V			
Strobe output	Low: 0 to +1.0 V, High: +4.0 V to + 5.0 V			
Digital I/Os	Isolated IN (4), Isolated OUT (8)			
General				
Lens mount	C mount/CS mount switchable (C mount at the shipment)			
Power requirements	DC 10.5 to 26.4 V			
Power consumption	17.4 W (Max.)	18.2 W (Max.)	17.4 W (Max.)	18.2 W (Max.)
Dimensions (W x H x D)	94 x 70 x 139.5 mm (3 3/4 x 2 7/8 x 4 1/2 inches)			
Mass	760 g (1.7 oz)			
Operating temperature	-5 to +45 °C (23 to 113 °F)			
Storage temperature	-30 to +60 °C (-22 to 140 °F)			
Operating humidity	20 to 80 % non condensing			
Storage humidity	20 to 95 % non condensing			
Vibration resistance	10 G (20 to 200 Hz)			
Shock resistance	70 G			
Regulations	FCC/IC/CE/VCCI Class A, MIC			
Supplied Accessories	Lens mount cap, C mount conversion adopter (installed), Fall-prevention wire rope, Screw, Operating instructions
