COMPANY PROFILE

TORDIVEL AS is a company based in Oslo, Norway, with sales and support office in Sweden.

From the start up in 1992, Tordivel AS has been a partner for major Norwegian companies in bringing the emerging Windows technology into both existing and new products.

In 1996 a team of vision and image processing specialists was established to provide vision solutions. From 1997 to 2000 we installed a large number of inline advanced vision system for mobile telephone inspection in Norway and Sweden. Since 2000 our unique Scorpion Vision Software® has been the platform for vision systems and OEM solutions.

Today we have users, partners and distribution globally. The company has fifteen highly skilled employees and work within the following business areas:

SCORPION VISION SOFTWARE
Global distribution, training and support of Scorpion Vision Software®.

SCORPION SYSTEM SOLUTIONS
Delivery of Vision systems in Norway and Sweden.

SCORPION OEM
Custom vision solutions based on Scorpion Vision Software.

Scorpion Vision Software® is a registered trademark of Tordivel AS.

BUSINESS STRATEGY

Our strategy is to provide the industry with independent software for configuration, operation and surveillance of vision systems utilizing industry standard components and communication interfaces. Digital cameras connected to PCs via standard interfaces like Firewire has created a major shift in the vision industry from proprietary systems to open software solutions.

SCORPION VISION SOFTWARE®

Compared to a traditional industrial vision approach, Scorpion Vision Software® offers "Twice the performance - Half the price". It is designed for skilled production engineers that want to develop and maintain their own vision solutions without having to depend on an expensive vision system integrator.

Scorpion Vision Software® is a family of products:

Scorpion Lite - For simple tasks replacing sensors.

Scorpion Basic - For simple assembly verification and gauging.

Scorpion Standard - For high precision gauging, robot vision and label inspection.

Scorpion Enterprise - Unlimited for demanding multi-camera applications.

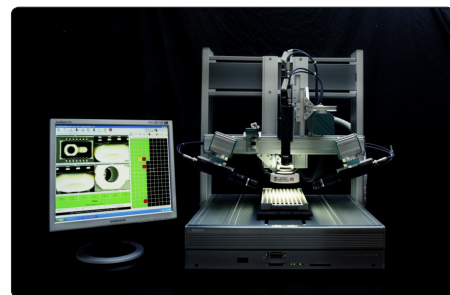

Scorpion Vision Software® is:

Independent - for configuration of vision systems built upon standard PCs and Windows. Interface with plug-ins; dynamic link libraries (DLLs) and Active-X. Complete support for DirectX and Firewire Imaging.

Flexible - complete range of robust and easy to use vision tools, out of the box rs-232, tcp/ip and opc support, configu-

DISTRIBUTION AND SUPPORT

Scorpion Vision Software® is distributed through partners. They provide local training and support for all types of users. Tordivel AS supports partners with training, knowledge and expertise, enabling them to support well-qualified customers. Tordivel AS is continuously searching for distributors and partners in all countries.

Scorpion Vision Software® used in robot inspection

vable data and image logging support combined with unique python scripting capability.

Cost Effective - no programming, step by step adaption to changing demands, remote support and off-line verification and modifications ensures the lowest development, installation and maintenance cost.
